

Transact Over EDI

# Savings, Speed, and Security

## Streamline your order processing with Summit

Summit's Electronic Data Interchange (EDI) capabilities make it easy to submit orders, receive order acknowledgments, and obtain advance shipping notifications.

### EDI can help you:

- 1. Reduce manual processes** – Eliminate paper processes or one-off communications to verify order receipt or shipping notices.
- 2. Increase order accuracy** – Reduce data-entry errors and accelerate information flow.
- 3. Reduce security risks** – EDI is less susceptible to hacks, data interceptions, and tampering than manual data entry.
- 4. Save time and money** – Through error reduction, process automation, and increased security – EDI saves you time and money.

Find out how to get started at [summit.com/edi](https://summit.com/edi).
